

HARLAXTON

SUMMER 2024

ADD AN INTERNSHIP TO YOUR 5-WEEK SUMMER PROGRAM!

Students participating in the Summer 2024 summer program have an exciting option, for an additional \$3690 students can complete a three-hour internship while living at the Manor. We will offer the students personalized attention in creating their placement and helping with questions throughout the process.

1. Additional expenses for students are the Student Visa costs and any transportation costs associated with the internship.
2. The dates for the internship are during the second summer session.
3. During this time, room and a 12 meal a week meal plan at the Manor are included in the fee as well as the three-credit hour course.

Students wishing to complete this internship in the summer will need to complete the summer internship application in addition to the summer application. Once completed, our internship team in the UK will reach out to help with your placement.

Internships add value and depth to your study abroad experience! In addition to promoting self-discovery and gaining practical experience, interning in the UK will enhance your employability or advance your aspirations for graduate school. Earn academic credit while you live in a 110-room Manor house, travel independently, and grow your global network!

Note: The internship opportunity is an independent add-on to our summer programming. Internship students will be in a new cohort during the second summer session. The focus of your time at Harlaxton during the second summer session will be to complete your internship. As such, the internship add-on does

not include everything in our standard summer programming. Internship students will not be provided with a BritRail England pass or be booked onto the London excursion.
